CIBO / INDUSTRIAL LINE / CONICAL

FNC

FOR STEEL FABRICATION.

For fast steel stock removal, heavy weld dressing and general fabrication.

115 / 125 / 150 / 180mm

BUILT FOR STEEL STOCK REMOVAL.

FNC uses strong poly-cotton abrasive cloth for sustained steel grinding. Choose 40 grit to remove metal quickly when stock removal takes priority over surface finish. The stronger cloth supports steady cutting and consistent wear during weld dressing and fabrication.

STRONG CLOTH

Poly-cotton cloth supports sustained steel grinding and consistent abrasive wear.

40 GRIT / FAST REMOVAL

For aggressive steel grinding, heavy weld dressing and shaping when finish is secondary.

MEDIUM PRESSURE

Use medium working pressure for the best performance from FNC.

RANGE & SPECIFICATIONS

CONICAL / ZIRCONIA / CLOTH FLAPS

SIZES, GRITS & PART NUMBERS

Disc diameter x bore	Grit	Maximum RPM	CIBO part number
115 x 22mm	40	13,300	FNC/40/115
115 x 22mm	60	13,300	FNC/60/115
115 x 22mm	80	13,300	FNC/80/115
125 x 22mm	40	12,200	FNC/40/125
125 x 22mm	60	12,200	FNC/60/125
125 x 22mm	80	12,200	FNC/80/125
150 x 22mm	40	10,200	FNC/40/150
180 x 22mm	40	8,500	FNC/40/180

PRODUCT PROFILE

Specification	CIBO FNC
Abrasive / flaps	Zirconia / strong poly-cotton cloth flaps
Backing / shape	Glass fibre / conical
Materials	Steel, stainless steel and cast iron
Top coating / waterproof	None / no - for dry use
Working pressure	Use medium working pressure

APPLICATIONS

40 grit: fast stock removal and heavy steel grinding. 60 grit: general weld dressing and deburring. 80 grit: finer blending. FNC also works stainless steel with a sufficiently powerful grinder; choose FSC for lighter-pressure stainless work.

Choose the correct diameter and grit for your task. Follow the disc and machine instructions and never exceed the maximum RPM marked on the disc.
