CIBO / INDUSTRIAL LINE / CONICAL

FSC

FOR STAINLESS STEEL WORK.

For stainless-steel grinding and blending with effective cutting at lighter pressure.

115 / 125mm / GRITS 40-120

STRONG CUT. LIGHTER PRESSURE.

FSC uses flexible abrasive cloth for a ready cut at lighter pressure, including on 750W grinders. Choose 40 grit for aggressive stainless-steel stock removal, weld preparation and shaping. Choose finer grits for blending and scratch refinement.

FLEXIBLE CLOTH

Designed to start removing material effectively even at low working pressure.

40 GRIT / STOCK REMOVAL

Aggressive grinding, weld preparation and shaping on stainless steel.

LOWER-POWERED GRINDERS

Effective cutting at lighter pressure, including with 750W machines.

STAINLESS STEEL / STEEL / CAST IRON

RANGE & SPECIFICATIONS

CONICAL / ZIRCONIA / CLOTH FLAPS

SIZES, GRITS & PART NUMBERS

Disc diameter x bore	Grit	Maximum RPM	CIBO part number
115 x 22mm	40	13,300	FSC/40/115
115 x 22mm	60	13,300	FSC/60/115
115 x 22mm	80	13,300	FSC/80/115
115 x 22mm	120	13,300	FSC/120/115
125 x 22mm	40	12,200	FSC/40/125
125 x 22mm	60	12,200	FSC/60/125
125 x 22mm	80	12,200	FSC/80/125
125 x 22mm	120	12,200	FSC/120/125

PRODUCT PROFILE

Specification	CIBO FSC
Abrasive / flaps	Zirconia (zirconium oxide) / flexible cloth flaps
Backing / shape	Glass fibre / conical
Materials	Steel, stainless steel and cast iron
Top coating / waterproof	None / no - for dry use
Working pressure	Cuts readily at light pressure; use controlled pressure

APPLICATIONS

40 grit: aggressive removal, weld preparation and shaping. 60 grit: general grinding. 80/120 grit: finer blending and scratch refinement. Keep abrasives for stainless steel separate from those used on carbon steel.

Choose the correct diameter and grit for your task. Follow the disc and machine instructions and never exceed the maximum RPM marked on the disc.
